Crews simulate oil spill clean-up in Boston Harbor during exercise

Please feel free to publish and distribute the following materials free of charge.

In this photo released by the U.S. Coast Guard, Navy Supervisor of Salvage and Diving crews aboard two boom handling boats work to pull a 300-foot inflatable boom leg and a Marco Class V Skimmer System vessel in Boston Harbor during a simulated oil spill for the 2010 Spill of National Significance exercise, Wed., March 24, 2010. The SONS exercise, which simulates a rare catastrophic spill, provides an opportunity for emergency responders from more than 50 different agencies to practice a joint response to a major spill. Coast Guard photo by Petty Officer 3rd Class Connie Terrell.

In this photo released by the U.S. Coast Guard, Navy Supervisor of Salvage and Diving crews aboard two boom handling boats work to pull a high speed Current Buster System in Boston Harbor during a simulated oil spill for the 2010 Spill of National Significance exercise, Wed., March 24, 2010. The SONS exercise, which simulates a rare catastrophic spill, provides an opportunity for emergency responders from more than 50 different agencies to practice a joint response to a major spill.
