

# Freighter Jireh Removal and Disposal Process

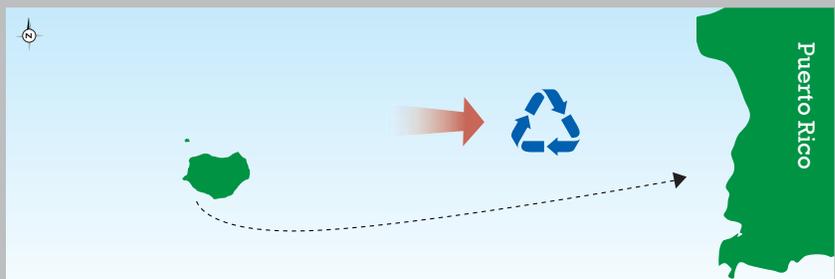

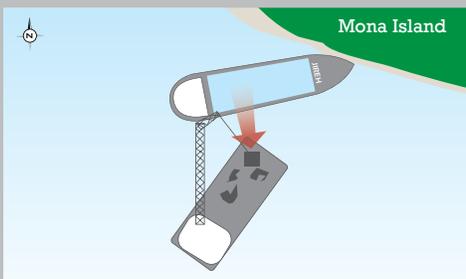

**1** Sections of the freighter Jireh will be cut off and placed on barges to reduce the weight of the ship. The metal pieces will be taken to Puerto Rico for recycling.

**2** Flotation bags will be placed aboard the freighter Jireh and the ship will be refloated.

**3** The freighter Jireh will be towed to a point between half a mile and 12 miles south of Mona Island and sunk for disposal.

**4** If the ship cannot be refloated, the freighter Jireh will be completely cut up and placed on barges. The ship pieces will be taken to Puerto Rico for disposal and recycling.
